CERTIFIED MAIL

The Berada Corporation
Gardena Valley Dump Division
2185 Huntington Drive
San Marino, California

Attention Mr. J. W. Fisher

Gentlemen:

GARDENA VALLEY DUMP (I-3727)

Investigations conducted by the State Department of Water Resources, at the request of Regional Water Pollution Control Board No. 4, have resulted in a determination that "cutting oil", if allowed to percolate into ground water, or if the material is leached to ground water, might impart a disagreeable taste or odor to the water. For this reason the Division of Water Resources has recommended that "cutting oil" not be approved for acceptance in Class II refuse disposal sites.

At its regular meeting on April 23, 1959, Regional Water Pollution Control Board No. 4 acted to delete from the list of materials acceptable in Class II refuse disposal sites the item "Occasional loads of cutting oil containing small amounts of hydrocarbon oils".

Effective immediately upon receipt of this letter your Industrial Waste Permit is amended to delete from Section 2.400 "Liquids and Semi-Liquids Acceptable at Class I and Class II Sites Only" the Item listed as 2.412, which reads as follows:

"2.412 Occasional loads of cutting oil containing small amounts of hydrocarbon oils".

A copy of this letter must be attached to the Conditions of your Industrial Waste Permit, a copy of which must be available on your site at all times.

Yours very truly,

John A. Lambie
COUNTY ENGINEER

Original Signed

Arthur Pickett, Division Engineer
Industrial Waste Division
